### **Glossary**

CAPTURE, COPD Assessment in Primary Care To Identify Undiagnosed Respiratory Disease and Exacerbation Risk

CLHT, Canadian Lung Health Test

COPD, chronic obstructive pulmonary disease

COPD-PS, Chronic Obstructive Pulmonary Disease-Population Screener

Dx, diagnosis/diagnose(d)

FVC, forced vital capacity

FEV, forced expiratory volume

HCP, healthcare provider

ICS, inhaled corticosteroid

LABA, long-acting beta-agonist

LAMA, long-acting muscarinic antagonist

LLN, lower limit of normal

NRT, nicotine replacement therapy

OCS, oral corticosteroid

PCP, primary care provider

pt, patient

QOL, quality of life

Rx, prescription

SABA, short-acting beta-agonist

SAMA, short-acting muscarinic antagonist

SSM, supported self-management

Tx, treatment

w/, with
